

MARIANA CASTAÑEDA BEDOYA

Medellín | phone: +57 3245022871 | macbedoya@gmail.com | [LinkedIn](#)

Frontend developer | Vue Js | NoSQL | TypeScript

PROFESSIONAL PROFILE

Frontend Developer with experience building web and mobile platforms from the ground up, focused on creating scalable, maintainable, and performance-driven interfaces. I specialize in translating functional requirements into clear and efficient digital solutions, actively contributing to frontend architecture decisions and the continuous improvement of production-ready products. I thrive in collaborative Agile environments, with a strong focus on User Experience (UX), code quality, and process optimization.

PROFESSIONAL EXPERIENCE

Ikualo, Spain

2024 - Current

Front End Developer

- Built the administrative backoffice (Vue.js) and mobile application (React Native) from scratch, managing the full development lifecycle from initial architecture to production deployment.
- Implemented a Micro Frontends architecture on the web platform, delivering a modular, scalable, and highly maintainable solution.
- Designed and developed a modular library of reusable components aligned with the design system, enhancing maintainability, visual consistency, and development speed across projects.
- Integrated frontend applications with backend services via REST APIs, ensuring efficient communication and seamless data flow management.
- Optimized administrative backoffice performance, significantly improving load times, module organization, and overall user experience.
- Developed and integrated critical mobile features, including authentication, onboarding, transfers, and card management, directly impacting platform operations.
- Collaborated within cross-functional teams in sprint planning, code reviews, and functional validation under Agile methodologies.

Freelance

2024 – Current

Front End Developer

- Developed custom web applications and interfaces, prioritizing scalability, maintainability, and high performance.
- Implemented solutions using Vue.js, TypeScript, JavaScript, and Firebase, adhering to industry best practices and version control via GitHub.
- Integrated frontend applications with backend APIs and services, ensuring seamless data management and visualization.
- Partnered with clients to define requirements, prioritize features, and provide technical guidance throughout the development lifecycle.

EDUCATION

Technology in Multimedia and Web Development

SENA

Current

Coding and Programming Bootcamp: Front End

Makaia

2023

One - Oracle Next Education

Oracle + Alura Latam

2022

TECHNICAL SKILLS

Programming Languages

- JavaScript
- TypeScript

Frontend Frameworks & Libraries

- Vue.js
- React
- React Native

Architecture & Patterns

- Modular Component Architecture
- Micro Frontends
- REST API Integration & Consumption

State Management

- Zustand
- Pinia

SOFT SKILLS

- Analytical Thinking & Problem-Solving
- Teamwork & Effective Communication
- Autonomy & Continuous Learning
- Proactivity
- Organization & Accountability
- Focus on Quality & Continuous Improvement
